#### **DETAILED ACTION**

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 43-45, 48, 50-52, 55, 57-59, 62 and 64-66 rejected under 35
U.S.C. 102(b) as being anticipated by Matsen III, et al. (US 4,979,949). Matsen,
III et al. teach a robot-aided system for surgery which system comprises a
resection guide 215 adapted for guiding a cutting device relative to a patient's
bone during arthroplasty, an alignment guide 54 coupled to said resection guide
215 and adapted for attachment to the patient's bone, said alignment guide 54
including a first assembly 152 for positioning said resection guide along a
translational path and a second assembly 148 & 142 for positioning said
resection guide along a first rotational path and a second rotational path, and a
computer navigation system 198 coupled to said resection guide.

Concerning the language "adapted for attachment to the patient's bone", it has been held that the recitation that an element is "adapted to" perform a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. *In re Hutchison*, 69

Application/Control Nuller: 09/811,042

Art Unit: 3732

USPQ 138. In the present case, the alignment guide 54 of Matsen, III et al. *could* be attached to a patient's bone.

Additionally, it is noted that the law of anticipation does not require that the reference "teach" what the subject patent teaches, but rather it is only necessary that the claims under attack "read on" something in the reference. *Kalman v. Kimberly Clark Corp.*, 218 USPQ 781 (CCPA 1983). Furthermore, the manner in which a device is intended to be employed does not differentiate the claimed apparatus from prior art apparatus satisfying the claimed structural limitations. *Ex parte Masham*, 2 USPQ2d 1647. In the instant case, the assemblies 142, 148, 152 and 154 could be controlled in such a way as to position the resection guide along any of three rotational paths and any of three translational paths.

## Allowable Subject Matter

Claims 46, 47, 49, 53, 54, 56, 60, 61, 63, 67-71 and 73 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-42 and 74-81 are allowed.

## Response to Arguments

Applicant has argued that Matsen, III et al. (U.S. 4,979,949) does not teach an assembly which positions along a translational path. The Examiner believes that one could draw an infinite number of straight lines through a point

Application/Control Number: 09/811,042

Art Unit: 3732

on the resection guide. Each of these lines may be considered a translational path and the resection guide would be *positioned* along a translational path regardless of its ability to *move* translationally or along a translational path.

#### Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael B. Priddy whose telephone number is (703) 308-8620. The examiner can normally be reached on Mon.-Fri. 8 a.m. - 5 p.m..

Application/Control Number: 09/811,042
